Proficient in HTML/CSS, Bootstrap, MySQL, JavaScript (ReactJS & React Native), Java, Python and many more frameworks and tools".

## Experience

### SKYSOFT TECHNOLOGY

November 2021 to Now

Software Developer

Douala, Cameroon.

<https://www.linkedin.com/company/skysoft-technology-cm/>

As a developer at SkySoft Technology, I design and develop secure, high-performance REST APIs in Java using Spring Boot, implementing the business logic, database management (SQL/NoSQL) and performance optimisation. I'm integrating Spring Security for user management and working on distributed microservices architectures. On the front end, I'm developing responsive interfaces in Angular, optimising communication with the backend via HTTPClient. I apply the principles of Clean Code and SOLID, carry out unit and end-to-end tests (Mockito) and maintain the code via CI/CD (Jenkins, Docker). Committed to an Agile approach, I work with the DevOps and UX/UI teams, take part in code reviews and carry out technological monitoring to ensure the continuous improvement of the technical stack.

## Education

### Andela Learning Community, Pluralsight

July 2023 to July 2024

React Meta Learning Program

Web Development

### OpenClassrooms

April 2020 to June 2021

Frontend Developer

Bachelor's in Frontend Development

## Some Personal Projects

### Modern Business App

2023

Responsive ReactJS UI

[https://xander1936.github.io/modern\\_business\\_app/](https://xander1936.github.io/modern_business_app/)

Here's a reactjs modern\_business\_app created by JavaScript Mastery and built from scratch with vitejs, tailwindcss and by using a figma design (made up of 89% ReactJS - JavaScript). Source code link: [https://github.com/Xander1936/modern\\_business\\_app](https://github.com/Xander1936/modern_business_app)

### Netflix Clone

2023

<https://xander1936.github.io/netflix-clone/>

Netflix Clone is a javascript clone of Netflix. This project covers classes, dynamic functions with calls to apis, methods and conditions (made up of 46% JavaScript). Source code link : <https://github.com/Xander1936/netflix-clone>
